PANA INSTITUTE

COMPETENCE PROGRAMMES FOR ENERGY & INDUSTRY

PANA Institute builds the practical competencies that keep plants, grids, pipelines, and industrial institutions running safely and efficiently. Short, immersive, hands-on professional programmes mapped to international engineering standards and OEM technology.

174+ Courses • 10 Technical Domains • API, ISO, IEC & NCDMB Aligned • Bespoke In-House Delivery

About PANA Institute

PANA Institute is a premier center of excellence for technical engineering training, capacity building, consulting, research & development (R&D), and sustainability solutions across Energy, Oil & Gas, Power, and Industrial Automation. Our instructors are seasoned industry practitioners, practical sessions use real plant equipment and telemetry data, and each programme confers verified credentials with unique QR codes.

Ø<ß¯ OUR VISION

To be Africa's premier competency solutions partner for the energy, power, and digital industries.

Ø=Þ€ OUR MISSION

To develop and upskill the workforce through experiential training that cultivates practical competencies directly applicable to real job roles.

Training Delivery Formats

- **Instructor-Led Virtual (Live):** Interactive live sessions with real-time Q&A, whiteboards, and breakout technical labs.
- **Classroom & Laboratory Hub:** Hands-on hardware training using live test benches, calibration loops, and plant simulators.
- **Onsite Corporate Bespoke:** Custom tailored curriculum delivered directly at your refinery, offshore facility, or industrial plant.
- **Hybrid Blended Modules:** Combined self-paced theory review backed by intense hands-on physical validation.

10 Technical Competence Domains

Over 174 specialised courses across the entire energy, power, and industrial value chain:

DOMAIN 01 — **Power and Drives (21 Courses)**
Centrifugal/reciprocating compressors, gas turbines, dry gas seals, microgrids, VSD systems, motors.

DOMAIN 02 — **Valves and Actuation (17 Courses)**
Control valves, safety relief valves, emergency shutdown (ESD), actuators, positioners, Fugitive emissions.

DOMAIN 03 — **Integrated Automation & Digital Operations (20 Courses)**
DCS, PLC/SCADA, SIS & SIL (IEC 61508/61511), industrial cybersecurity, smart instrumentation, telemetry.

DOMAIN 04 — **Measurement & Management (18 Courses)**
Custody transfer metering, ultrasonic & Coriolis flowmeters, gas chromatographs, sampling & prover systems.

DOMAIN 05 — **EPMICE Field Operations & Lifecycle (19 Courses)**
Asset integrity, predictive maintenance (RCM/FMECA), vibration analysis, mechanical seal systems.

DOMAIN 06 — **Exploration & Subsurface (16 Courses)**
Geophysical data acquisition, seismic interpretation, reservoir characterization, formation evaluation.

DOMAIN 07 — **Production Operations & Wells (16 Courses)**
Wellhead systems, artificial lift, separation processes, water injection, flow assurance, produced water management.

DOMAIN 08 — **Marine, Offshore & Subsea (14 Courses)**
FPSO systems, subsea trees and manifolds, riser integrity, dynamic positioning, marine terminal logistics.

DOMAIN 09 — **Sustainability Solutions & Energy Transition (16 Courses)**
Decarbonisation, flare gas recovery, carbon capture (CCUS), methane abatement, green hydrogen blending, ESG.

DOMAIN 10 — **Supply Chain, Procurement & Quality (17 Courses)**
MRO critical spares management, vendor pre-qualification, contract law, inventory optimisation, warehouse safety.
