PANA AI USER GUIDE & SAMPLE PROMPTS

Official Platform Copilot, Navigation Guide & Administrator Action Manual

PANA Institute (PANA Energy Services Ltd) • System Documentation

Welcome to PANA AI! PANA AI is the built-in intelligent assistant on the PANA Institute platform. Whether you are a first-time visitor exploring technical courses, an enrolled engineering student, an instructor preparing course materials, or a platform administrator managing the website, PANA AI is designed to help you get tasks done faster and navigate seamlessly.

1. VISITORS
- Course advice
- Accreditations
- Fee inquiries
- Online enrollment

2. STUDENTS
- Lesson mentor
- Assignment tips
- Concept clarifier
- Cert download

3. INSTRUCTORS
- Quiz generator
- Rubric builder
- Syllabus creator
- Lab exercise ideas

4. ADMINS
- Update site text
- Change prices
- Swap live images
- Instant course post

1. Visitors & Prospective Learners

PROSPECTIVE INQUIRIES

Course discovery, certifications, physical vs virtual delivery, and corporate quotes.

Course Guidance & Recommendations:

"Which engineering course is best for a beginner in oil & gas instrumentation?"

"I work in electrical maintenance. What certifications do you offer for high-voltage systems?"

"What courses cover Energy Transition, Carbon Capture, and Renewable Energy?"

Accreditations & Certificates:

"Are PANA Institute certificates verifiable by employers?"

"How do I verify a certificate with its unique verification ID number?"

"What international standards (ISO, IEC, SAE) are your courses aligned with?"

Corporate Packages & Delivery Formats:

"Do you offer online virtual classes or only physical classroom labs?"

"Can my company request tailored on-premise training for 20 engineers?"

"What is the phone number and address of your Abuja and Port Harcourt offices?"

2. Enrolled Students (24/7 Co-Instructor)

ACADEMIC MENTOR

Technical engineering concepts, assignment coaching, exam tips, and certificate downloads.

Technical Engineering Explanations:

"Can you explain how a 4-20mA current loop works in industrial instrumentation?"

"What is the difference between HAZOP and FMECA in plant safety analysis?"

"Explain cavitation in centrifugal pumps and how to prevent it in plant operations."

"What are the key safety steps before performing hot work in a hazardous area?"

Study & Exam Coaching:

"Give me 5 practical study tips for preparing for the Process Control exam."

"Help me understand the formula for calculating pump Net Positive Suction Head (NPSH)."

"Can you give me a real-world scenario of predictive maintenance using vibration analysis?"

Student Portal Shortcuts:

"Where can I see my enrolled courses and lesson progress?"

"How do I submit my module assignment and check grading?"

"Where can I download my verified completion certificate?"

3. Instructors & Curriculum Designers

TEACHING ASSISTANT

Quiz generation, rubric creation, 4-day syllabus structuring, and lab scenarios.

Assessment & Quiz Creation:

"Generate 5 multiple-choice questions with answer explanations for a quiz on SCADA and PLC architecture."

"Draft 3 scenario-based essay questions for a final exam on Pipeline Integrity Management."

Curriculum & Lab Outlines:

"Create a 4-day syllabus outline for an intermediate course on Valve Sizing and Selection according to ISA standards."

"What practical lab exercises should I include in a course on Industrial Heat Exchangers?"

"Design a grading rubric for evaluating student engineering case-study presentations."

4. Administrators & Operations Staff

EXECUTIVE SUPERPOWERS

Interactive one-click site editing, price adjustments, banner replacement, and brochure publishing.

A. Update Website Text & Contact Info

Modify addresses, phone numbers, or section texts on any page directly from the chat.

- **"Update the Abuja phone number to +234 702 600 0000"**
- **"Change the central email to admissions@pana-institute.com"**
- **"Update About Us mission to: Delivering world-class technical engineering training."**

&¡ Action: Displays an interactive 'Confirm & Apply to Website' action card with database preview.

B. Change Course Prices via Course Code

Instantly set or modify course fees using standard course codes (e.g., SC05, EX13).

- **"Change SC05 price to 50000"**
- **"Update the course fee for EX13 to 75000"**
- **"Set course PD01 price to 0 (Free)"**

&¡ Action: Updates price column in courses table, clears is_price_tbd, and recalculates is_free.

C. Replace Website Images & Hero Banners

Upload a file directly or replace existing website images with a single confirmation.

- **"Replace the homepage hero banner"**
- **"Update the website header logo"**
- **"Change the course thumbnail for SC05"**

&¡ Action: Presents an image replacement card with slot review and device file upload button.

D. Extract & Publish Courses from Brochures

Upload a PDF or flyer brochure. PANA AI extracts modules and publishes the course with thumbnail.

- **"Here is the brochure for EX13 Reliability Centred Maintenance. Extract modules and publish the course."**
- **"Publish course EX14: Subsea Pipeline Engineering, 32 hours, advanced level with 4 day modules."**

&¡ Action: Creates course and modules in database with smart upsert to avoid duplicate records.

E. Publish News & Press Releases

Draft and post live press releases and articles to the public blog.

- **"Publish a news article: PANA Institute signs corporate training partnership with Baker Hughes for asset integrity training."**
- **"Draft and post a press release announcing our new 2026 Energy Transition programs."**

&¡ Action: Generates unique slug and commits directly to blog_posts with published status.

INSTITUTIONAL GOVERNANCE & BRAND RULES

1. Brand Name: Always referred to strictly as "PANA Institute" (never "PANA Academy" or "PANA Institute & Academy").
2. Route Governance: The system does not use /training-calendar; all course browsing is directed to /courses.
3. Privilege Safety: Action cards for database modifications are only rendered for authenticated Administrator sessions.
4. Visitor Engagement: A non-intrusive teaser bubble offers course advice after 10 seconds of site dwell time.
